

TELECOM SOLUTIONS

- Cellular Backhaul (Wireless Bridges)
- GSM-4G-LTE, 5G Solutions (BSS)

Repeaters, Connectors, RF Cables & All Range Of Web Guide

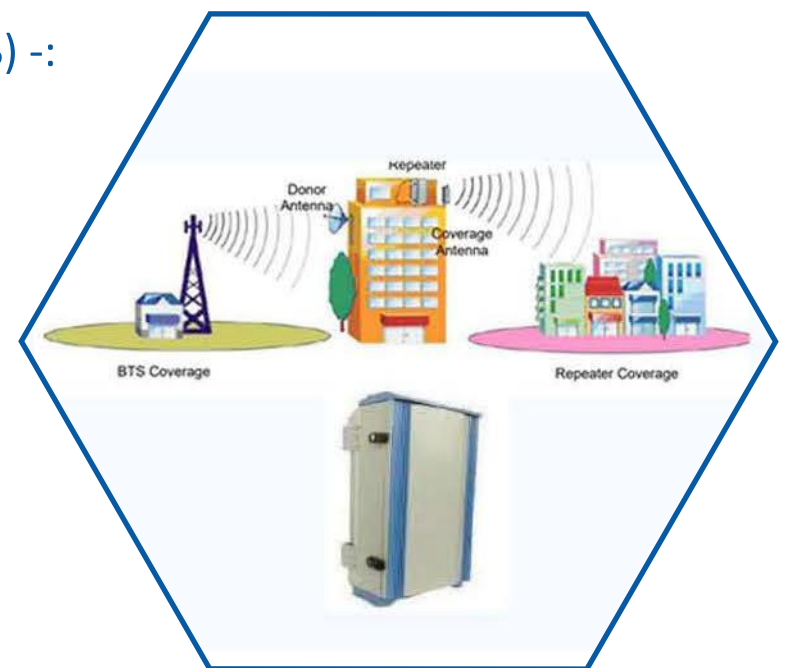

RF REPEATER(RFR)/ INTERFERENCE CANCELLATION SYSTEM REPEATER(ICS) :-

Secez services provides the solution of weak mobile cellular signal, which is much cheaper than adding a new Base Station (BTS).

In many rural areas there are hundreds of highway kilometers wandering through open areas and small villages.

Due to lack of telecom infrastructure, these un-serviced or under serviced areas can be covered by using RF Repeaters.

Main operation of RF Repeaters system is to receive low-power cellular signal from BTS via radio frequency (RF) transmission and then transmit the amplified signal to the areas where network coverage is inadequate. And the mobile signal is also amplified and transmitted to the BTS via the opposite direction.

All Types Of Accessories / Connectors :-

Secez Services provides exceptional high quality products and customer service in the telecommunications industry.
