SOLUTIONS FOR DIGITAL INVESTIGATIONS
One window into all the evidence

CRIMINALS ARE TAKING ADVANTAGE OF TECHNOLOGY TO COMMIT CRIMES AND EVADE DETECTION.

Growing data volumes and the rise in evidence coming from mobile devices, social media, and cloud computing are crushing investigators' ability to make informed decisions.

Complex criminal cases can involve multiple suspects, many devices, large volumes of data, and cross local, state, and national boundaries. Law enforcement agencies and organizations need to distribute the workload between many people and effectively collaborate with counterparts in other jurisdictions. Nuix investigations solutions are proven to help the world's largest agencies and organizations solve real-world investigations.

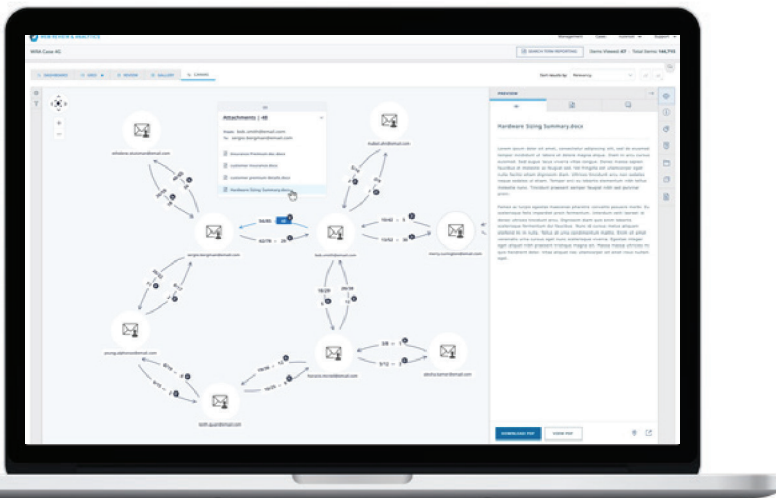

THE NUIX ADVANTAGE

See the big picture, fast. Visualize large volumes of communications data to understand who's talking to whom, which suspects are most influential, identify hidden connections, and establish what they're talking about and what data they've shared.

Accelerate investigation timelines. Quickly cull irrelevant data and simultaneously compare past and present findings and real-time events and behaviors, drastically reducing the time it takes to uncover insights.

Maximize your existing investments. Bring your existing forensic technology together and ingest data from all evidential sources into Nuix, providing a single view across all your data.

Reduce time and improve efficiency. Let Nuix technology do the hard work of finding connections between evidence sources and artifacts, highlighting connections you'd struggle to find, freeing up valuable resources' time to concentrate on more strategic tasks and reduce the queue.

Collaborate securely. Share information with case investigators and integral parties, including non-technical users, to get relevant eyes on the evidence and get to the critical facts faster.

Left: Enhance your visibility across all communications using the Nuix Web Review & Analytics communication canvas.

WHAT WE DELIVER

Nuix investigations solutions are an investment in your people, future-proofing your workflow and improving your efficiency as an organization. For budget holders, Nuix offers much more value per person than single-user software ever can.

MAKE THE MOST OF SCARCE RESOURCES. With Nuix at the heart of your operations, you can integrate our industry-leading capabilities with third-party software in a scalable, efficient workflow. Parcel out evidence to specialist analysts or reviewers, then bring everything back together to analyze, cross-reference, and report on.

GAIN A 360° VIEW OF ALL YOUR DATA. Consolidate and visualize all your evidence sources: user and system files; email and mobile data; intelligence reports; virtual machines; databases; Facebook subpoenas and other social media; internet of things devices including routers, dashcams, and drones; human-generated sources such as door access logs and airline stubs; and data in the cloud.

ADDRESS CYBERATTACKS AND INSIDER THREATS AS THEY HAPPEN. Connect to any device in real time and rapidly triage activity and user behaviors. If you spot something suspicious, you can forensically collect data for immediate investigation and take rapid remedial action based on your findings.

BUILD INTELLIGENCE REPOSITORIES. Retain intelligence artifacts for cross-case and cross-team use—and they'll immediately be identified if they appear in concurrent or future investigations. Store notes, comments, bookmarks, and canvas states to share with other analysts or retrieve later.

FIND CORRELATIONS WITH VISUALIZATIONS AND ANALYTICS. Simplify investigations by bringing together disparate data sources and identifying correlations across people, objects, locations, and events. Using powerful data visualizations and analytics, accessible from any web browser, investigators and teams can draw connections and discover patterns, leading to greater insight into the data.

CREATE REPEATABLE, DEFENSIBLE INVESTIGATIONS. Apply repeatable workflows that reveal pertinent case information and assure that if you follow the process again, you will arrive at the same conclusion—a key element of defending your case in court.

SERIOUS FIREPOWER FOR INVESTIGATIONS

Unlike traditional investigative tools, Nuix gives you precision, automation, and collaboration across all aspects of the investigation. The proprietary Nuix Engine quickly extracts key entities and information, correlates and contextualizes thousands of data types, and gives you the insights you need to make faster and more accurate decisions. Collaboration in Nuix allows technicians and reviewers to access case data simultaneously, providing value per user and a strong return on investment.

Expand visibility and empower collaboration for all your investigations.

Nuix understands the DNA of data at enormous scale. Our software pinpoints the critical information organizations need to anticipate, detect, and act on risk, compliance, and security threats. **To learn more visit www.secez.com**
